

**RESULTS OF THE 2003
2GHZ AND UP WORLD WIDE CLUB CONTEST
SPONSORED BY THE S.B.M.S.
SAN BERNARDINO MICROWAVE SOCIETY**

CLUB	ENTRIES	SCORE ORIGINAL	CORRECTED
SAN BERNADINO MICROWAVE SOCIETY	16	21,468	21,468
Mt Airy VHF CLUB "PACKRATS"	08	7,610	12,510
MIDWEST VHF UHF SOCIETY CLUB	04	4,498	6,316
SAN DIEGO MICROWAVE GROUP	04	8,108	6,108

These were the only logs I received; you will notice that the scores are different from what was submitted
This was a result of me not explaining the scoring process more clearly.
I have gone through the logs that were sent and corrected to best of what I can figure out

I will explain as best I can again and rules will be rewritten better for next year

Each band is counted separately,
Power level multipliers are separate for each band,
Unique calls are separate for each band

Total distance in km X power level multiplier + unique calls for that band = band score

Total all bands to get total score

I hope this helps for next time, also we are looking at moving the date later in the year about a month, better
Weather and need to promote this, any suggestions are welcome, please respond to n6rmj@sbcglobal.net
